CARPATHIAN FOREST SCHOOLS
Classes in the woods to inspire future ecologists

PROJECT TITLE	Carpathian Forest Schools – A Pilot Cooperation for Nature Protection and Environmental Education
IMPLEMENTATION PERIOD	01.10.2019 – 31.07.2022
ORGANISATIONS INVOLVED	Tourist Association of Ivano-Frankivsk Region (UA); Vyhoda Village Council (UA); NFA Romsilva – Administration of Maramures Mountains Nature Park (RO); Dolyna District State Administration (UA)
PROGRAMME	Hungary-Slovakia-Romania-Ukraine ENI CBC 2014-2020
TOTAL BUDGET	672.333,53 €

The project aims to support forest preservation practices in the Carpathian cross-border area by enhancing environmental education and raising awareness of local communities on the value of forest biodiversity. The project has launched two Forest Schools – environmental education centres – which are interpreting and disseminating information about nature and environmental conservation works. The partners are also developing the Forest Schools curricula and they are running workshops in the nature, at observation facilities that will remain active long after the project ends. They have organised cross-border training camps in the mountains for university students and volunteers, with the scope to train youth during out-of-school activities and to increase their environmental consciousness.

PROTECTION OF NATURE AND BIODIVERSITY

ENVIRONMENT

BSB SMART FARMING
The digital transformation of agriculture: increased quality, better use of resources

PROJECT TITLE	BSB Smart Farming – Jointly preparing the conditions in the agricultural and connected sectors in the BSB area for the digital transformation
IMPLEMENTATION PERIOD	14.07.2020 – 13.03.2022
ORGANISATIONS INVOLVED	Pieriki Anaptixiaki S.A.-O.L.A. (GR); "Dunarea de Jos" University of Galati (RO); Fund "Investment Support Center" (AM); Business Advisory Center (MD); Iakob Gogebashvili Telavi State University (GE); Business Agency Association (BG)
PROGRAMME	Black Sea Basin ENI CBC 2014-2020
TOTAL BUDGET	697.695,40 €

The digital transformation of the agricultural sector requires transition from traditional cultivation to modern methods through the use of new technologies. The BSB Smart Farming project helps to speed up the digital transformation in the agricultural and related sectors in the Black Sea area, and to improve the capacities of the farming community, academia, public institutions, industry actors and entrepreneurs for cross-border trade opportunities. Many are the activities planned by the partners, among which mapping the preparedness for smart farming in BSB partner countries, launching of Smart Farming platform and creating Smart farming networks of stakeholders. The project also plans to promote the digital transition in agriculture, and to strengthen the entrepreneurship ecosystem of cross-border smart agriculture in the Black Sea Basin.

PLUARoztocze
300 km on a bike across nature

PROJECT TITLE	PLUARoztocze: B(L)ike Roztocze together in spite of borders
IMPLEMENTATION PERIOD	01.11.2018 – 28.02.2022
ORGANISATIONS INVOLVED	Zamość Commune (Poland); Lubelskie Voivodeship (Poland); Roztocze National Park (Poland); Yavorivskiy National Natural Park (Ukraine); Association of self-governments "Euroregion Carpathians - Ukraine" (Ukraine); Department of Ecology and Natural Resources of Lviv Oblast State Administration (Ukraine)
PROGRAMME	Poland-Belarus-Ukraine ENI CBC 2014-2020
TOTAL BUDGET	2.011.060,97 €

PL-BY-UA
2014-2020

Roztocze is a picturesque range of hills stretching from south-east Poland to the western Ukraine. It is a multicultural area with unique geography and ecosystems of a great value. The Polish and Ukrainian partners of the PLUARoztocze project invested into the development of tourism infrastructure, raising ecological awareness among local citizens and tourists, about the valorization of the eco-tourism potential of the region. The project has created a 300-km bike route with bike stops and service points, wooden sheds, information boards and watchtowers together with by a mobile app and publications to attract local and foreign tourist. As well, two centers (one in Poland, one in Ukraine) were built to foster environmental education among the population; they also serve as places for natural and cultural exhibitions, meetings for youth and folklore groups and tourist information points. The cross-border approach, based on a linear infrastructure and tourist products with an eye on nature protection, has resulted in creating objects which can be used by all "together in spite of borders".
