

Session 5: Is the water clean and passable enough for fish to survive?

Session host: EUSDR Priority Area 4 – Water Quality

13th Annual Forum of the EU Strategy for the Danube Region
20-21 June 2024, Vienna, Austria

Raimund Mair
Sr. Water Resources Management Specialist
World Bank Water Global Practice
Europe and Central Asia

Globally... Water is essential

**Water sustains
the planet**

**Water is a vital
factor of production**

**Water is the
essence of life**

But... Water is in crisis

Too much

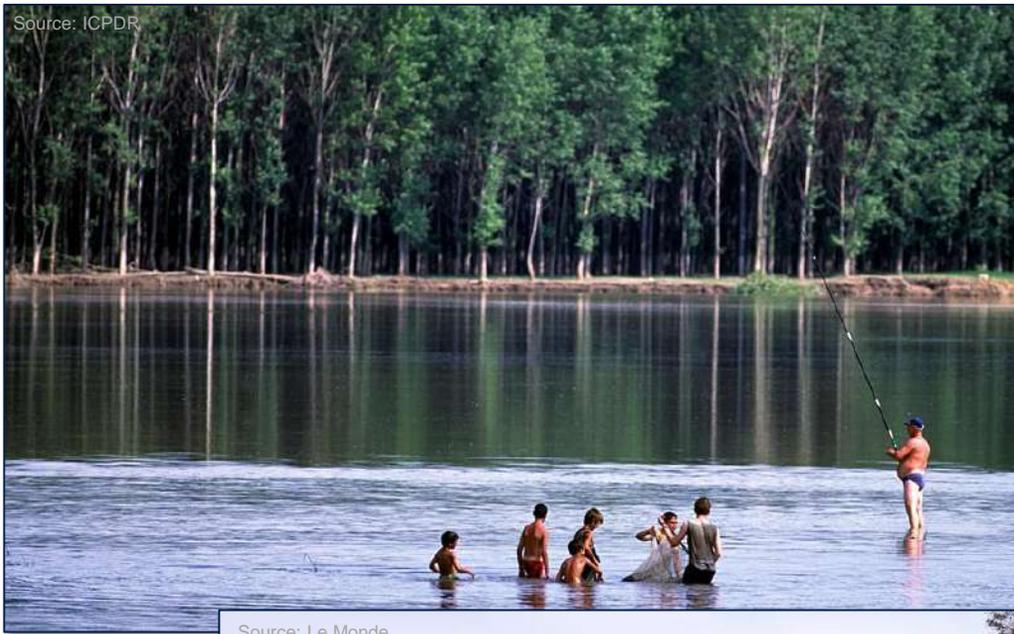

Too polluted

Too little

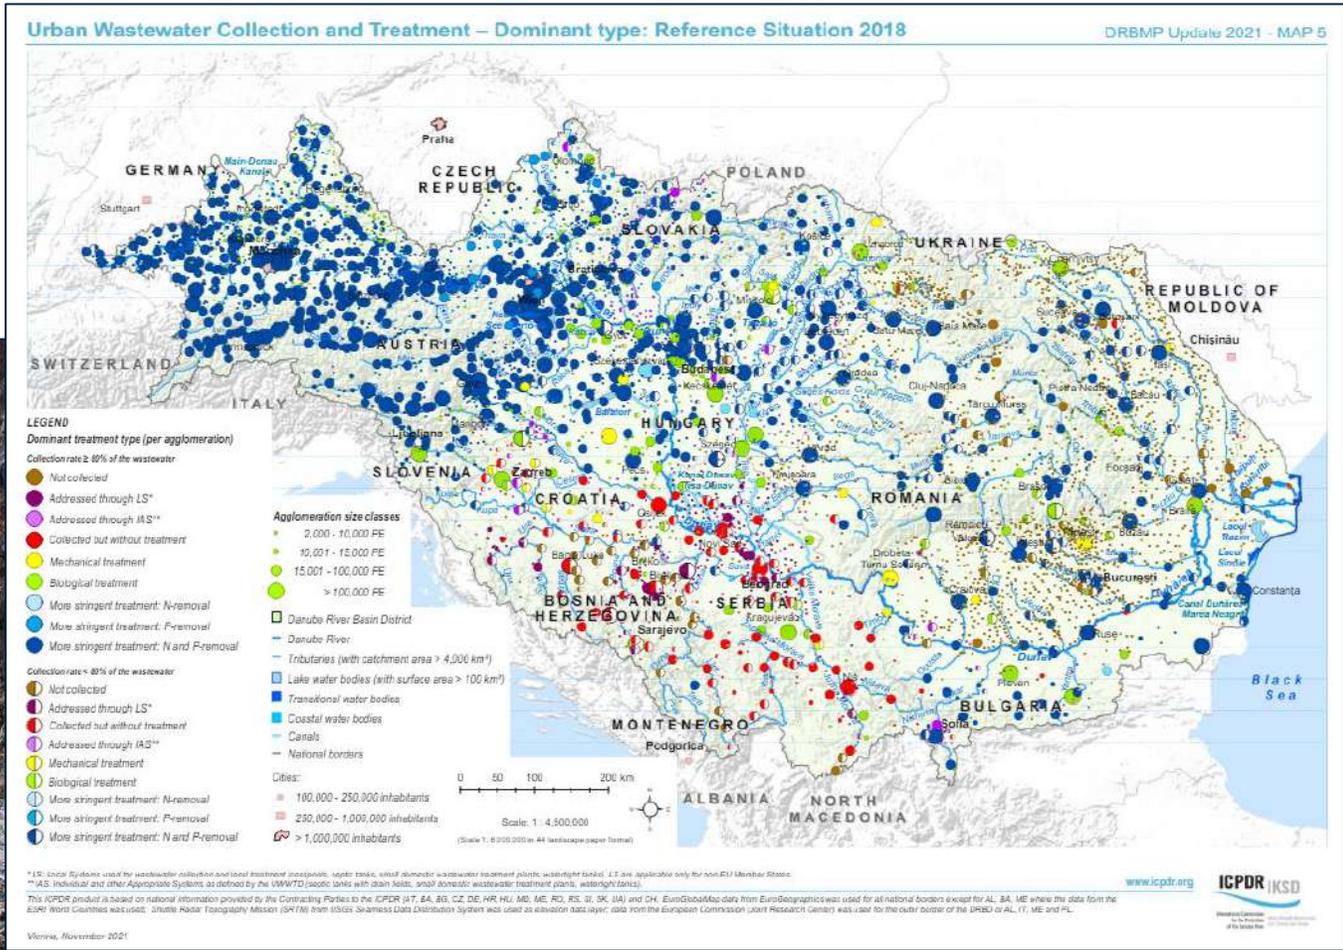

Source: Le Monde

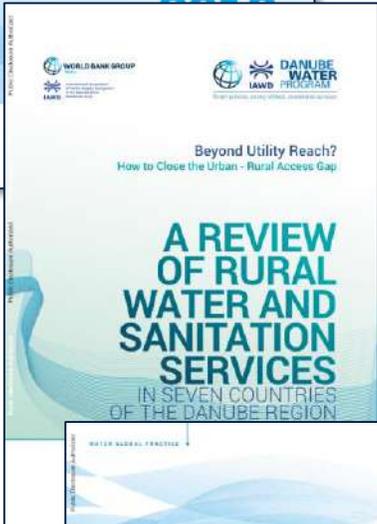

What about the Danube River Basin?

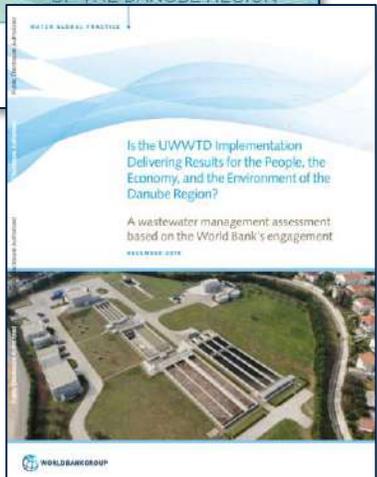

As a result of the efforts, countries in the region have witnessed major **improvements in terms of water pollution.**

Improvements partially derived from **UWWTD** implementation; others, such as the **Nitrates Directive** and **Industrial Emissions Directive** also substantially contribute.

A total of **€42.5 billion** have been invested by the seven latest EU member states of the Danube Region to implement the UWWTD. An **additional €57 billion** will be needed to reach and maintain compliance until 2040.

Addressing bottlenecks and creating the **enabling environment**: Technical and institutional capacity enhancement and effective regulation crucial for successful project implementation.

Technical Assistance and Institutional Capacity Building efforts in the Danube Region

**DANUBE
WATER
PROGRAM**

**10
YEARS**

**Knowledge
sharing**

**Analytical and
advisory work**

**A STATE OF
THE SECTOR**

**Capacity
building**

Thank you!
